

Evidence your clients can inspect.

Build a recurring service around buyer questions, original answers, practical actions and reports.

A repeatable monthly deliverable

Choose a question set, inspect retained answers and sources, prepare an action brief, then export a report for the client's decision.

Keep the commercial scope clear

Five clients × 15 questions × four rounds in one market = 300 complete searches. This planning example fits Business at \$129 USD/month plus tax.

Use the same full feature set

Professional \$49/100 credits; Business \$129/300; Agency \$299/750. All monthly tiers include the same features. Choose by expected search volume.

Report the evidence accurately

Keep question, date, market, source labels and counts visible. Separate observed answers from proposals and supplied analytics. A before/after difference is not causal proof.

1 credit = 1 complete question, market/language and run across selected available sources. Monthly credits reset without rollover. Separately held non-expiring credits remain distinct. Saved report reading and exports use no additional search credit.
